

Thank you for purchasing EyeQueue. Your photo booth has been configured to work with your unique hashtag.

The **first time** you start your system you just have to do a few quick things make sure everything is working properly.

https://youtu.be/q_gniCMEel

1. Turn on the computer
2. Log into Windows using your password, provided in the folder when your display was delivered.
3. Each time you turn on the computer the photo booth application will automatically start, it may take a few minutes. The first time you start the computer you will need to set up your internet connection.
4. If the photo booth application has already started running select **QUIT** in the application settings panel.
5. Select **OK** from the pop-up asking if you want to quit.
6. Swipe the lower right of the screen to access the settings panel.
7. Select **NETWORK**.
8. Find and set up your internet connection.
9. Restart your computer and log back into windows.
10. The photo booth application will start running automatically after a few minutes.
11. Now just click the checkbox next to **AUTO START (1)** and then click **SAVE (2)**
